

A hand-drawn diagram of a river. On the left, a vertical line represents a dam. A horizontal line represents a bridge crossing the river. The river is filled with small circles representing water. On the right side of the river, there are two vertical lines representing a bank or a fence.

Technical drawing of a road intersection. A rectangular structure is shown with dimensions 1, 1, 8, and 10. A curved arrow indicates a radius of R10. The drawing includes dashed lines and a green outline.
